

Manuel Verdejo García

DATA ANALYST & BI SPECIALIST

 Huelva, Spain |  +34 691931582 |  manuelverdejo2000@gmail.com

 [LinkedIn](#) |  [Portfolio](#)

PROFESSIONAL PROFILE

Mathematician specialized in advanced analytics, statistical modeling, and data visualization. Proven experience extracting actionable insights for strategic decision-making using Python, SQL, and Power BI. Strong background in Machine Learning (regression, clustering, forecasting), Explainable AI (XAI), and building interactive dashboards. Passionate about translating complex data into clear business value.

TECHNICAL SKILLS

- **Programming & Databases:** Python (Pandas, Scikit-Learn, XGBoost, Prophet), SQL, R, MATLAB, HTML/JS.
- **Data Visualization & BI:** Power BI (DAX, Power Query), Advanced Excel, Plotly, React (for XAI dashboards).
- **Statistical Modeling & ML:** Predictive Modeling, Time Series Forecasting, Cluster Analysis, PCA, Causal Inference, Explainable AI (SHAP, LIME).

PROFESSIONAL EXPERIENCE

DATA ANALYST

Transmoro S.L | September 2025 – Present

- Developed a predictive Machine Learning model in Python to monitor fleet fuel consumption, implementing automated alerts to detect anomalous or excessive usage.
- Engineered Power BI models for logistical route cost-benefit analysis, automating cost allocation to invoices and auditing insurance payment accuracy.
- Designed and deployed an interactive web-based calculator (HTML/JS) enabling stakeholders to easily estimate trip costs and compare alternative routes.

DATA ANALYST

E-ASY | October 2024 – May 2025

- Implemented non-linear regression models, PCA, and clustering techniques to generate advanced insights for client and product segmentation.
- Engineered interactive Power BI dashboards, applying descriptive statistics to track trends and monitor key business metrics.
- Automated complex ETL processes using SQL to feed Power BI data models, significantly reducing data processing and reporting times.
- Delivered data-driven strategic recommendations for multiple clients within a digital

consulting environment.

HIGHLIGHTED PROJECTS

Sales Forecasting Engine | Python, XGBoost, Prophet, SHAP

- Developed an advanced time-series forecasting pipeline combining hybrid models: Prophet for seasonality/trends and XGBoost for exogenous variables.
- Implemented SHAP values to provide interpretability for business stakeholders and utilized Statsmodels for robust series diagnostics.

Credit Scoring & Explainable AI (XAI) System | Python, LightGBM, LIME

- Engineered an advanced credit evaluation system using a hybrid architecture (Logistic Regression, XGBoost, LightGBM).
- Integrated Explainable AI techniques (SHAP, LIME) for transparency, along with Monte Carlo simulations and fairness metrics to audit model bias.

End-to-End Business Intelligence & Analytics | Power BI, DAX, Python

- Designed interactive Power BI dashboards utilizing complex DAX measures for domains like International Football statistics and Literature trends.
- Conducted comprehensive sales analysis (BMW dataset) integrating descriptive statistics, clustering, PCA, and regression to optimize market strategies.

EDA Master PRO (AutoML Platform) | JavaScript, Web Workers, Python

- Built a purely client-side "No-Code" platform for Exploratory Data Analysis and automated Machine Learning.
- Integrated intelligent data cleaning (MICE), statistical tests (ANOVA, Chi²), and Python code generation for production environments.

EDUCATION

Degree in Mathematics

University of Seville

CERTIFICATIONS & COURSES

- **Google Professional Certificates:** Data Analytics (240h), Project Management (240h), UX Design (240h) - *Coursera & Google*
- **Business Intelligence & Big Data Analysis** (120 hrs) - *BILIB*
- **Data Analysis & Visualization with Excel and Power BI** (125 hrs) - *BILIB*
- **Advanced Machine Learning:** Python for ML & DS, Intro to Neural Networks, SQL for Data Science.
- **Advanced Analytics in R:** R for Data Science, PCA, Clustering, Multivariate Time Series Forecasting.
